WATER SOFTENERS AND CHLORIDE REDUCTION

Check to see how your softener is calibrated. Some softeners are pre-set for the highest hardness setting at the factory. This setting may be as hard as 30 grains. Reset the hardness to 20 grains.

Soften only water used inside the home. Do not treat the outside hose faucets.

Check the timer. When

was it last adjusted? Many of us move into a house or purchase a water softener and never check it again. Children move out or other factors come into play that affects the amount of water we use. If your softener is regulated by a timer, you may be able to increase the interval between regeneration cycles without affecting the water quality. Increase the time by one day and see if there is

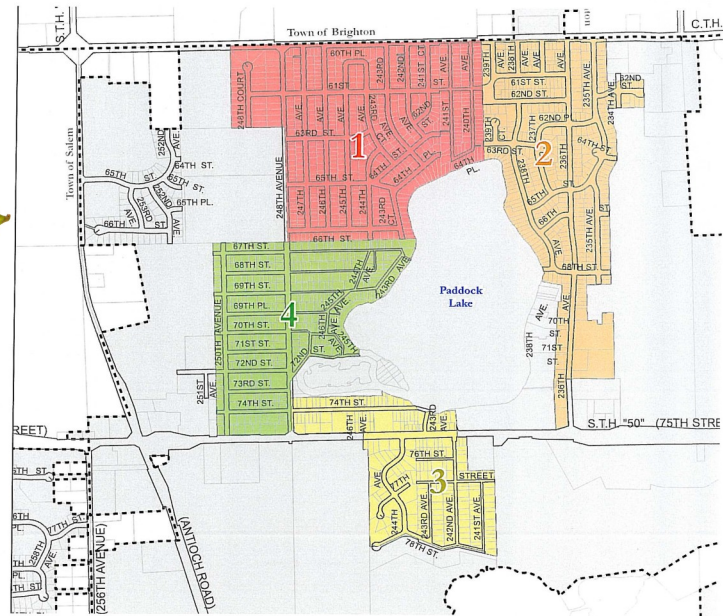

any effect on dish washing and laundry during the next month.

If you are replacing your old softener, replace it with a softener that regenerates based on a meter or a sensor. The Benefits to you are a substantial cost savings from your salt and water usage reduction, with the added benefit that you are helping to protect our environment right here in the Village of Paddock Lake.

ALL DOGS OVER 5 MONTHS OLD ARE REQUIRED TO BE LICENSED IN THE STATE OF WISCONSIN. PLEASE BRING PROOF OF RABIES VACCINATION TO THE VILLAGE HALL. ALL LICENSES EXPIRE ON DECEMBER 31, 2025
